

# BLUeCODE - Installation guide and Demo

Visit the website at the link:

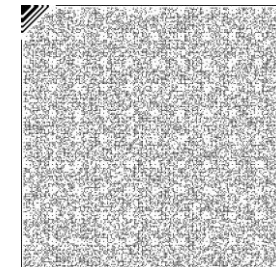

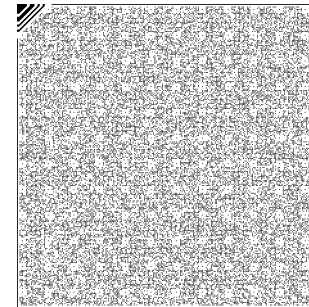

<https://bluenetita.com/en/bluecode.html>

Download the app for your smartphone

After installing it and after granting authorization to use the camera, frame one of the codes below:

BLUeCODE can be generated at different resolutions and sizes. It contains images, text, biometric features. All data can be encoded with security keys and signatures.

An image of Naples and Vesuvius encoded within the 2-D code.

You can try to print the document and scan directly on paper, or scan from the screen of your PC or mobile phone. BLUeCODE is a black and white image. The only thing that matters is not to deform it.
